A TRIBUTE TO THE NATIONAL ASSOCIATION OF PEOPLE WITH AIDS (NAPWA)

HON. KAREN MCCARTHY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 27, 1999

Mrs. MCCARTHY of Missouri. Mr. Speaker, I rise today to recognize the National Association of People with Aids (NAPWA)—the leading advocate on behalf of all people living with HIV and AIDS in order to end the pandemic and human suffering caused by HIV/AIDS.

NAPWA was founded in 1983 in Denver, Colorado, at the Second National AIDS Forum. This organization has been at the forefront of the AIDS epidemic to address the issues of equality and equal access to treatment and prevention methods regardless of race, gender, class, or sexual orientation. On Saturday, July 31, 1999, NAPWA will hold their Annual Retreat in Kansas City, Missouri, including a public forum on "AIDS Now and in the New Millennium," where a panel of leading experts, including Sandy Thurman, Director of the Office of National AIDS Policy, will discuss the latest developments in the effort to end the AIDS crisis. This forum will provide an opportunity for city, county, state, and national leaders, AIDS Service organizations, HIV infected individuals, health departments, faith communities, and medical professionals to talk about issues surrounding the AIDS epidemic and the funding that is needed to maintain quality health care services and innovative prevention strategies.

At this forum, NAPWA will welcome Roger A. Gooden—an AIDS survivor and tireless advocate for people with AIDS—as the newly elected Chairman of the Board of Directors. Mr. Gooden has a rich history of fighting for AIDS/HIV treatment and prevention, as well as for the rights of people with AIDS. He currently serves on the State of Missouri's Governor's Council on AIDS and the Board of Directors of the National Council on Alcoholism and Drug Dependence of Greater Kansas City. Recently, Mr. Gooden was honored by the Missouri Department of Health Division of Environmental Health and Communicable Disease Prevention, Bureau of HIV/AIDS Care and Prevention Services, in recognition of his dedication and service to the State of Missouri in advocating for people living with HIV/AIDS and the prevention of the spread of HIV. Mr. Gooden was also honored by Kansas City Mayor Emanuel Cleaver and the City Council with a resolution and proclamation recognizing his election as Chairman of the Board of NAPWA and for his dedicated service and efforts in the fight against AIDS.

NAPWA is an active and effective organization, providing many services to legislators and people with AIDS/HIV. For instance, NAPWA provides Community Education, Technical Assistance, and Regional Training Workshops around the country for people with HIV, to give them the skills they need to participate in HIV prevention community planning with Ryan White CARE Act Planning Bodies. NAPWA also coordinates a diverse national network of committed public speakers through the Leadership Development Initiative. This

EXTENSIONS OF REMARKS

initiative, coupled with the Youth Initiative involves outreach services where peers talk to peers about AIDS and HIV, encouraging each other to modify risk behaviors and change attitudes toward people with AIDS/HIV.

NAPWA also participates in a wide array of prevention, health promotion, and educational efforts for those infected with and at risk for HIV. NAPWA publishes several fact sheets, alerts, and reports, as well as supporting an Information and Referral Service, to provide the nation with up-to-date and accurate information about the AIDS pandemic. NAPWA also sponsors National HIV Testing Day in June of each year, to encourage early and frequent testing for HIV/AIDS, especially for those who are at higher risk.

Mr. Speaker, NAPWA's highest priority is the development of effective new treatments and a cure for HIV disease. Please join me in commending NAPWA for its tireless efforts on behalf of people with AIDS.

ELECTRONIC DISCLOSURES
DELIVERY ACT OF 1999

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 27, 1999

Mrs. ROUKEMA. Mr. Speaker, millions of consumers today routinely conduct business over the Internet, buying and selling a myriad of products and services from companies large and small, near and far. Many of these consumers already conduct much of their banking business over the web, checking balances, transferring funds and paying bills without leaving their homes. This explosion of on-line banking offers great benefits on both sides of the transactions: even the tiniest small-town bank can have access to a national marketplace, while consumers can comparison shop for the best interest rates or services. Nonetheless, the delivery of many financial services over the Internet, such as loans and mortgages, are limited by antiquated laws requiring paper documents or face-to-face transactions.

That is why I am joining today with Congressmen RICK LAZIO and JAY INSLEE to introduce the Electronic Disclosures Delivery Act of 1999. This legislation is necessary if we are to take full advantage of the current technology—and if we are to keep technology from leaping far ahead of the ability of our nation's laws to regulate it.

The Electronic Disclosures Delivery Act addresses the electronic delivery of disclosures, notices and other information over the Internet. It allows these actions to be provided electronically, but does not lessen the rights or responsibilities of any party or affect the content of any disclosure, including both the timing, format and information to be provided.

This legislation is a first step toward making on-line financial transactions practical. It would put Congress on record as committed to playing a leadership role in promoting electronic commerce while preserving and, indeed, enhancing consumer protections. Mr. LAZIO and I plan to hold hearings in our respective subcommittees to ensure that all interested parties' views are heard.

18357

On-line disclosures will provide consumers with a number of benefits:

Convenience and time-saving—Consumers can conduct transactions virtually anywhere and at any time, 7-days-a-week, 24-hours-a-day.

User friendly information—Legalistic jargon in on-line disclosure forms can be linked to plain-English definitions, making them much more readable and understandable. Consumers can electronically search documents rather than reading through reams of paper.

Enhanced services for under-served communities—Rural and urban communities will have enhanced access to financial services, even where brick and mortar branches are not available. In areas where residents cannot afford computers, libraries and schools provide on-line access.

Reduced cost—Electronic delivery of disclosures will cost less than providing the same information on paper or paying employees to handle face-to-face disclosures. Competition should encourage business to pass on those savings to consumers.

Congressional guidance on electronic disclosures is needed immediately, given that most of the consumer protection laws now on the books were enacted before the Internet became popular. Congress should provide uniform standards so that disclosures will be delivered to consumers under the same set of rules by all financial service providers.

Some regulators, notably the Federal Reserve, have begun to address these issues. But others have not, as in the case of the Department of Housing and Urban Development with respect to the Real Estate Settlement Procedures Act. Congressional action would provide uniformity and clarity among the agencies and provide guidance from the only body with the authority to amend the laws in question.

In sponsoring this legislation, we want to make clear that we do not intend to discourage the Federal Reserve from moving ahead. Instead, we want to encourage other agencies to follow the Fed's example. If anything, we hope the pace of regulatory activity in this area will be stimulated by congressional interest and action.

Congress and the regulators must play a leadership role in updating many of the consumer protection laws to reflect new technologies and establish a coherent legislative framework for the delivery of financial services through electronic commerce. With the introduction of this legislation, we can begin the debate that set us on the path to enacting responsible legislation that will enhance consumer access to financial services while maintaining appropriate consumer protections.

SUMMARY OF THE ELECTRONIC DISCLOSURES
DELIVERY ACT OF 1999

The "Electronic Disclosures Delivery Act of 1999" (the Act) amends the Truth in Lending Act, the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Real Estate Settlement Procedures Act, the Truth in Savings Act and the Consumer Leasing Act to provide for the electronic delivery of disclosures, notices, and any other information that is required to be given to consumers under these acts. The legislation provides that acknowledgments given in connection with disclosures or notices may also be provided electronically.
